The screenshot shows a terminal window with a dark purple background. At the top, there are four browser tabs open, all pointing to a local file path: `piu@work: ~/PP/Abhi/rest-api/src/app`. The terminal prompt is `mysql>`, followed by the command `select * from user_detail;`.

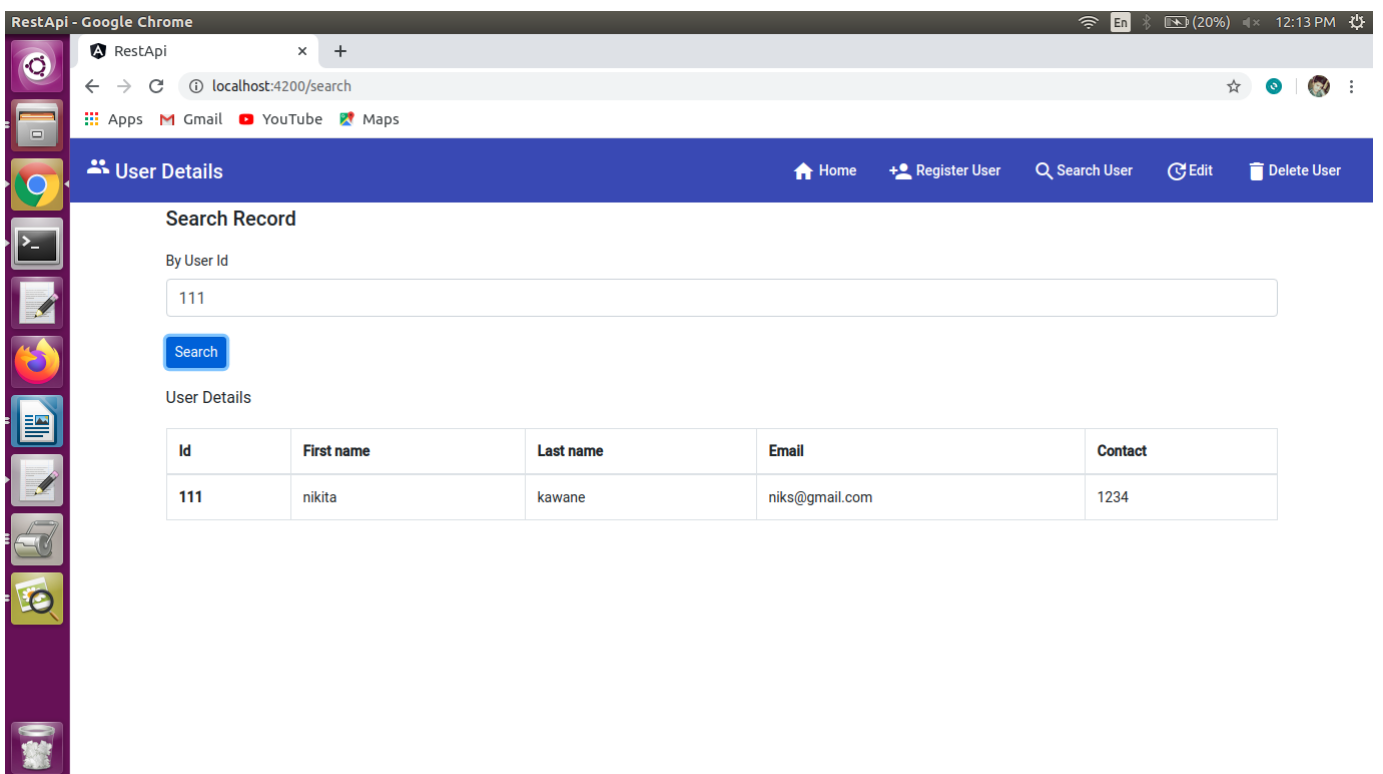

The output is a table with 11 columns: `id`, `first_name`, `last_name`, `email`, `password`, `contact_number`, `updated_by`, `deleted`, `creation_date`, and `last_update`. There are 8 rows of data displayed.

id	first_name	last_name	email	password	contact_number	updated_by	deleted	creation_date	last_update
101	Priya	Kawane	piukawane@gmail.com	piu54321	9370016871		0	1	2020-04-05 00:00:00 2020-04-16 10:49:10

Below the table, it says "8 rows in set (0.08 sec)". The prompt `mysql>` is shown again at the bottom.
